

Affordable Care Act Preventive Items

January 1, 2020

In accordance with requirements put forth through the Affordable Care Act (ACA), applicable employers elect to provide evidence-based Preventive Drug coverage at \$0. Below is the list of medications available for the ACA Standard Preventive Drug List.

The following list of preventive medications should be used as a guide. It cannot be considered a comprehensive listing of medications available or covered without a cost-sharing. This list includes classes that are covered under the ACA preventative list but is not inclusive of all drugs within a class. Coverage of any of the listed medications (including over-the-counter (OTC) medications) requires a prescription from a licensed health care provider. The availability or coverage of these medications without cost-sharing may be subject to criteria established by the terms of your benefit plan. Contraceptives may not be included under some plans.

This list will be reviewed periodically and is subject to change, as ACA guidelines are updated and formulary changes are made.

PREVENTIVE COVERAGE AT \$0 COST SHARE
