

Maintenance Drug List  
January 2020

Maintenance drugs are medications prescribed for chronic, long-term conditions and are taken on a regular, recurring basis. Examples of chronic conditions that may require maintenance drugs are: high blood pressure, high cholesterol, asthma and diabetes. Drugs included on the Maintenance Drug List are well-established medications that have proven safety and efficacy and are considered first-line therapy options for the treatment of common chronic conditions.

The list refers to the most common dosage forms and strengths of a product. Less common forms or strengths of a listed product may not be covered under the maintenance drug list. Most of these drugs are now available as generic drugs.

*Due to the large number of available medicines, this list is not all inclusive.* The list is subject to change.

Up to a 90-day supply is covered for drugs listed on the EpiphanyRx Maintenance Drug List if filled at an in-network retail pharmacy. To fill a 90-day prescription, the physician must write the prescription for a 90-day supply.

Drugs that are not listed on the Maintenance Drug List will be limited to 30-day supply at retail pharmacies.

Quantity limits, prior authorization and step-therapy requirements may apply.

Generic products are listed in lower case letters, brand name products are listed in CAPITAL letters. When a generic product is available, the prescriptions will be filled with FDA approved generic. If a generic is not available, brand product will be covered at your applicable brand copay.

**PRODUCT**

<b>ADHD/ANTI-NARCOLEPSY/ ANTI-OBESITY/ ANOREXIANTS</b>	CONCERTA	guanfacine hcl er
ADDERALL	COTEMPLA XR-ODT	INTUNIV
ADDERALL XR	DAYTRANA	KAPVAY
